Abstract (en)
[origin: FR2778829A1] The toothbrush comprises a reservoir (14) for toothpaste incorporated in its handle. The handle is extended at one end by a brush constituted by a base on which are implanted bristles. There is a system for the injection of toothpaste to the base of the bristles comprising a piston (20) sliding along a rod (34) in the reservoir. The piston divides the reservoir into a main chamber (16) containing the toothpaste and an empty chamber (18). A plug (22) sealing the reservoir is fixed to the second end of the handle.
