Abstract (en)
[origin: WO9960981A1] A dual purpose invalid walker (1), which is comprised of pairs of legs arranged in first and second planes being in transverse positions relative to the direction of movement, as well as a support frame (5) and/or a bracing frame (4) joining the legs together. The main characteristics of the present invalid walker is that a pair of legs being in one of the planes is simultaneously adjustable and fixable with a manually adjustable snap-bolt (12) arranged on a height adjusting column (11).
