Abstract (en)

[origin: WO9952601A1] A pushing/pulling treadmill exercise apparatus (1) having front and back sides, comprising: a) a frame; b) an endless treadmill belt (2), having an external surface and internal surface; c) two transversal front and back rollers (4, 3) rotating correspondingly about front and back axles, sections of the external surface of each of said rollers contacting a section of the internal surface of said endless treadmill belt (2), said two rollers (4, 3) rotating as the treadmill belt progresses; and c) means for providing a resisting force (27) to at least one of said rollers, for resisting its rotation, thereby resisting the progression of said treadmill belt; and d) means for controlling the level of said resisting force, <u>characterized in that</u> it comprises means for the user to apply to the treadmill belt a driving force (27) and means for the user to apply to the frame an equilibrating force.
