Abstract (en)

[origin: DE19822998A1] Horizontally superimposed stacks of envelopes are contained in the crate. A platform (7) holds a group(2a) of envelopes and has at least two spaced apart, vertical side guides (8). The side of the platform facing the removal-slide piece (9) has a cube-shaped transfer crate (11) open towards the platform, and with a closure appliance (12) opening on the end(11A) facing away from the platform. the transfer crate swivels by 90 degrees on a vertically movable horizontal axis (A1). The filling unit (18) is below the transfer crate's area of movement. A holder (21) has at least one vertically movable holder element (26) and a forward thrust appliance (22) with forward thrust element (31).
