Abstract (en)

[origin: FR2777884A1] Composition for preventing radical polymerization of ethylenically unsaturated monomers comprises at least a specified benzenetriamine derivative.- DETAILED DESCRIPTION - Composition for preventing radical polymerization of ethylenically unsaturated monomers comprises at least a benzenetriamine derivative of general formula (I): - in which: - R1 = H or an electron donor group; and - n = 0 - 5.- INDEPENDENT CLAIMS are also included for method for preventing radical polymerization of unsaturated monomers
