Abstract (en)

[origin: WO9960089A1] A detergent composition for use with a disposable cleaning pad preferably comprising an effective amount of a superabsorbent material, said pad preferably being part of a cleaning implement comprising a handle and said cleaning pad preferably being removable. The detergent composition contains a disappearing dye and, preferably, limited amount of detergent surfactant, preferably linear in structure and relatively hydrophilic, the level of hydrophobic materials preferably being kept below about 3 %, and the pH preferably being above about 9, to allow the superabsorbent material to be readily absorbed by superabsorbent material. The process of using the detergent composition with such a cleaning pad, and the provision of a kit containing both detergent composition and cleaning pad are disclosed.
