Abstract (en)
[origin: WO9960226A1] The invention relates to a gravel stop comprising a first lateral side (3) and a second lateral side (5) which sides are positioned at an angle to each other and joined to each other. At least one of the sides is configured as a connecting side (3) and can be joined to a roof (31) and the other side serves as the stop side (5). The gravel stop (1) is made of a composite material. The invention is notably characterized in that the composite material consists of a metal sheet (25) made of a non-corroding material which on one side is coated with a plastic film (27).
