Abstract (en)

An apparatus includes cutting means (4) for obtaining diskshaped washers from a semi-manufactured product (2) of natural cork, positioning means (22, 24) provided with a hollow body (22) and controlling means (24) for positioning said semi-manufactured product (2) so that its pores are disposed in a parallel manner with respect to said cutting means (4); the hollow body (22) is associated to lever means (46) oscillating between an external position in which said semi-manufactured product does not interfere with said cutting means (4) and an internal position in which said semi-manufactured product (2) interferes with said cutting means (4). <IMAGE>
