Abstract (en)

[origin: DE19823316A1] The invention relates to a bushing (10) and a method for producing a bushing, especially for a camshaft of a motor vehicle. Said bushing comprises a tubular section (12) and at least one flange (14) embodied at one end of the tubular section. According to the invention the flange (14) is embodied as a separate part and fixed to the tubular section (12), for example by means of a weld seam (16).
