Abstract (en)

[origin: WO9950368A1] A UV-curable acrylate base adhesive composition for digital versatile discs and other substrates, a method for bonding versatile digital disc layers together with a UV-curable adhesive, and a digital versatile disc bonded by a UV-curable or a radiation curable adhesive. The adhesive comprises acrylate functional components, non-acrylate reactive diluents (e.g. having acrylamide, or N-vinyl functionality) and thiol compounds.
