Abstract (en)

[origin: DE19913106C1] A hollow profile (12) of elastomeric material includes spaced conductive regions. These control the drive unit (15) of the window closure system (14). At one end (23) of the profile, connections are brought out. At another end (24) is a controller (28). Ends are wrapped round together, controller and connections lying side by side along the axis (13).
