Abstract (en)
[origin: WO9936998A1] An electrical connector in which there is a shield accessory plate (10) having a dielectric air space. Preferably the accessory plate (10) has a plurality of ground pin receiving apertures (14) having pin retaining lips (16) and a plurality of signal pin receiving apertures (12) having peripheral walls extending perpendicularly from the planar base structures and there being a plurality of link walls extending perpendicularly from the planar base structure to connect adjacent signal pin receiving structure peripheral walls.
