Abstract (en)
[origin: EP1083028A2] The device (1) has a planing tool (54), which is held in front of a planing head (10). The planing head has two cooling channels (25) and two cooling nozzles (45), which are arranged next to two opposite sides of the planing tool. The planing device also has a distributor device (30) with at least one supply for the cooling channels and at least one coolant connection (38,46) for the coolant supply. Independent claims are included for a planing head for use in the device and for a method to cool the planing tool of the device.
