Abstract (en)

[origin: EP1083031A2] The cutting machine (1) has a chain (5) running in an elongated guide (4) and driven by an electric motor (6). The chain and guide project through a slot (16) in a guide plate (12) which sits on top of the workpiece (2). A hose (9) on the opposite side of the saw to the motor sucks sawdust away from the working area. The chain consists of alternate central links which engage the drive sprocket and side links held by pins.
