Abstract (en)
[origin: WO9963091A1] The present invention relates to polynucleotide and polypeptide molecules for a disulfide core protein (Zdsc1). The polypeptides, and polynucleotides encoding them, are serine proteinase inhibitors. Also disclosed are expression vectors containing polynucleotides which encode a Zdsc1 polypeptide, antibodies which specifically bind to Zdsc1 polypeptides and anti-idiotypic antibodies which neutralize the antibodies which specifically bind to Zdsc1 polypeptides.
