Abstract (en)

[origin: FR2779184A1] The invention concerns an fuel- assembly for transferring fuel from a motor vehicle tank comprising a main pump (110) associated with a pressure regulator (170) and a reserve bowl (150) fed by a jet pump (160) and wherein the main pump (110) sucks up. The invention is characterised in that the jet pump (160) is integrated in the pressure regulator outlet (170) and the jet pump (160)/regulator (170) subassembly thus formed is made integral with a module (100) comprising the main pump (110) and the reserve bowl (150).
