Abstract (en)
[origin: EP1084654A2] The fixing device (1) has a fixing element (4), which is fixed to a rail of a pull-out guide, and a holder part (5), which is connected to the drawer front or integrally formed in it. The holder part is fixed in front of the fixing element, so that the holder part can be adjusted in a first horizontal or vertical direction with respect to the fixing element. The holder part is held relative to the fixing element by the front fixing in an original or an adjusted position and can be secured in each position. The holder part can be fixed and adjusted relative to the fixing element in a second direction perpendicular to the first. An Independent claim is included for an eccentric device for the fixing device.
