Abstract (en)
Pocket (1) for storage of for instance sheets of paper and photos, comprising a back sheet (4) and a front sheet (5) which back sheet (4) and which front sheet (5) comprise a lower boundary (14), an upper boundary (15) and two opposite side-boundaries, a first side-boundary (16) and a second side-boundary (17), to which first side-boundary (16) and to which lower side-boundary (14) on the back sheet (4) the first side-boundary (16) respectively the lower side-boundary (14) on the front sheet (5) is fastened for the creation of a partially closed pocket. On the back sheet's front side (20) facing the front sheet (5) is placed an adhesive means (13) for the adhesion of the free corner (12) of the front sheet. In this way a pocket is achieved which pocket in a simple and easy way ensures that the front sheet lies plane in relation to the underlying back sheet so that the papers lying between the two sheets, for instance in the form of a price list, will be easier to read and easier to handle without them falling out. <IMAGE>
