Abstract (en)
The invention relates to a packaging folding box which is provided with a re-sealable pourer/sprinkler opening and which can be handled in a traditional gluing machine and assembling/filling machine. The folding box has a tear-off tab (18) with grip part (20) for exposing at least one pourer/sprinkler opening punched out in an underlying folding box adhesive tab. The tear-off tab extends in the folding box wall (11a), to which the adhesive tab is secured, over the edge and into an adjoining folding box wall, formed by folding box-sealing tabs. Arranged directly under a corresponding folding box-sealing tab (14a) in which the grip part of the tear-off tab is formed, there is a further folding box-sealing tab (12b) which constitutes a continuation of the folding box adhesive tab and is not secured to the folding box-sealing tab (14a) provided with grip part. The grip part has end portions (22, 24) lying under the folding box-sealing tabs and intended for re-sealing the folding box. <IMAGE>
