Abstract (en)

[origin: EP1084981A1] The crane has a tiltable cantilever member (13) that is connected a further support member (33). A rear cable (9) is connected to position (8) on the support (3) to a position in the region of the top of the tower (11). A short cantilever member (52) is located between the cantilever member and further support member. The short cantilever member is connected to the main cantilever member via an upper belt and to the further support member via a lower belt.
