Abstract (en)

[origin: EP1085142A2] The gauge has an adjustable element (2 to 5) which can be set to the step height and to the tread width of a step of the staircase. The adjustable element is connectable at an angle to a further gauge element for the step above or below. Each gauge element comprises two right-angled elements of which for fixing the step height has a vertically aligned sleeve (4) in which a stud (3) of the other is telescopically adjustable and rotatable.
