Abstract (en)
[origin: EP1085182A1] An internal combustion rotary engine of the type comprising a rotor, an output shaft as the rotor axis, crankshafts mounting on output shaft, pistons reciprocable in piston chambers within the rotor, piston rods connecting the pistons to the crank of crankshaft. This rotary engine is characterized by the ignition force perpendicular to the output shaft radius, by radially spaced the crankshaft axis from output shaft axis, by connection between the output shaft and the crankshafts to concurrently synchronize them.
