Abstract (en)
In this invention, a camera position display portion (14) for displaying the position of a camera (3) at which a to-be-photographed person (1) looks at the time of photographing by the camera (3), a confirming process display portion (12) for displaying "wait for photographing" to the to-be-photographed person (1), an end display portion (12) for displaying "end of photographing" to the to-be-photographed person (1), and an exit display portion (13) for displaying "traveling direction after the end of photographing" to the to-be-photographed person (1) are provided and display of guidance as to the photographing state (the position at which the to-be-photographed person looks, waiting for photographing, end of photographing, traveling direction after the end of photographing) is made for the to-be-photographed person (1). Thus, the photographing state can be indicated to the to-be-photographed person (1) and applicants (10) for photographing who make a queue will not be kept waiting for a long time and can be dealt with as efficiently as possible. Further, by use of the above guidance display, not only a normal person but also a person who has difficulty in hearing can be guided without fail. <IMAGE>
