Abstract (en)  
[origin: EP1085489A2] The label has a base layer (2) and an adhesive layer (4) arranged on at least part of the base layer. The adhesive layer is formed on one edge of the ticket, so that the retention force in the direction of the edge is reduced continuously or in step. The edge has non-stick or less sticky areas (3), with a toothed or wavy structure, or a number of strips, to reduce the retention force.
