Abstract (en)

[origin: WO9964653A1] An oblong connecting strip (14) is provided to secure a weaving reed (1) to the batten (12) of a mechanical loom. The connecting strip runs in a substantially longitudinal direction (A) of said weaving reed (1) and is connected to the upper profiled section (4) of the weaving reed (1) in addition to being connected to the batten (12) at a distance from the weaving reed (1) in order to reduce the movement of the weaving reed (1) in a longitudinal direction (A).
