Abstract (en)

[origin: WO9964696A1] The invention relates to a hollow body (1) for displacing concrete in concrete buildings. According to the invention, parts (9, 10) of the hollow body are assembled with one another to form the hollow body. Said parts are connected using material, force and/or shaping, or the hollow body is formed by injecting gas from a preform or is formed by an inflatable element, especially a rubber bellow.
