Abstract (en)

[origin: EP1086902A1] Container(2) has its inner volume separated by a plug(8) into compartments(4, 5) to hold two different products (A, B) which are mixed prior to application, in first position the plug is held against walls of container by compression and in second compression is released. One or more of the compartments has outlet and cover linked to component which rotates plug between closed and open positions.
