Abstract (en)

The present invention relates to an optically active alcohol and the analogue thereof, i.e., (+)-cis-4-cumyloxy-2-cyclopenten-1-ol (1) and (-)-cis-1-acyloxy-4-cumyloxy-2-cyclopentene (2), which are useful as intermediates for biologically active compounds such as prostaglandins, and processes for preparing them. The invention also relates to the use of the optically active alcohol and the analogue thereof for the preparation of (-)-oxabicyclo[3.3.0]oct-6-en-3-one.
