Abstract (en)

In a process for obtaining patterned flock products, the following steps are included: application of fibres (1) of substantially uniform length and somewhat transparent, on a support element (2) on which a pattern has been predisposed, realised using colorants which are at least in part of a sublimating type; heat treatment, at a predetermined temperature, of the support (2) bearing the fibres (1) up until at least a partial sublimation of the colorants has been obtained from the support (2) to the fibres (1) applied thereon. <IMAGE>
