Abstract (en)

[origin: EP1087097A1] The device is for actuating a clutching unit (2) for a drive gearbox rotating a unrolling tube for a sunshade awning. This installation has an actuating cable (3) whose first end (3A) is connected to this clutching unit and whose second end (3B) is connected to a maneuvering handle (1B) of this activating device. The actuating device has electric feed connections (6,7,14-16), with a potential difference, this cable and an armature (4C), electrically conducting, with a insulation sleeve (4) surrounding this cable, this cable and this armature being adapted to be connected electrically (5-F1) as a function of the position of this clutching unit.
