Abstract (en)
[origin: EP1087147A2] The fastener for panels (1) comprises a mounting (4) in a bore in the panel into which a bolt (3) fits through a washer (5) . This allows the arm (2) of a hinge to be adjustably attached to the panel. The bore (6) in the hinge through which the bolt passes is larger than the diameter of the bolt and allows adjustment of the position of the panel. The arm has a recess (7) for the washer which assists the adjustment.
