Abstract (en)
An indoor unit of an air conditioner so designed that a top air inlet and its vicinity of the body casing can be cleaned easily. The indoor unit comprises a front air inlet (4) formed in the front of the body casing (1), a top inlet (6) formed in the top of the body casing (1) and a detachable top grating panel (7) slidable in the front-and-rear direction of the body casing (1) and covering the top air inlet (6). To clean the top air inlet (6) and its vicinity, the cleaning person detaches the top grating panel (7) from the front grill (3), and can clean them, and wash them with water necessary, in a safe posture while ascertaining the dirty portions and the extents in a short time with ease. <IMAGE>
