Abstract (en)

[origin: EP1087471A1] A plug (1) has a base plate (2) and a mating plug (3). The plug and the mating plug have clips (4,5) on the sides with centred retainers (6,7). The plug has a coded lug (8) on both sides of a clip (4) connected to a nut (10) by a standard bolt (9) through a centred retainer (6). The coded lug has an externally centred retainer (11) for fastening, resulting in a different allocation on the clip.
