Abstract (en)

[origin: WO9967415A1] Novel T110 polypeptides, proteins, and nucleic acid molecules are disclosed. In addition to isolated, full-length T110 proteins, the invention further provides isolated T110 fusion proteins, antigenic peptides and anti-T110 antibodies. The invention also provides T110 nucleic acid molecules, recombinant expression vectors containing a nucleic acid molecule of the invention, host cells into which the expression vectors have been introduced and non-human transgenic animals in which a T110 gene has been introduced or disrupted. Diagnostic, screening and therapeutic methods utilizing compositions of the invention are also provided.
