Abstract (en)
The present invention is directed to a portable, self-contained, device for dosing and/or dispensing at least one product into an appliance for treating laundry or dishes, said device comprising a housing with at least one compartment for containing said at least one product, said at least one compartment being closed by at least one corresponding cover, the device being characterized in that said device comprises at least one means for storing energy and releasing it, such that said product is released at one or more predetermined point(s) in time during the wash cycle. Preferably, said means is a battery, more preferably a rechargeable battery. Also preferably, said device comprises at least one sensor and/or at least one actuator for detecting when the wash conditions are optimal and open at least one of said at least one compartments for releasing a product.
