Abstract (en)
[origin: EP1088948A2] A roof covering element for covering a transition between a roof surface (7) and a part of a building (1) extending upward over the roof surface (7), where the roof covering element comprises a plate element (4), an internal covering (3), and an external covering (10), where the plate element (4) is fastened to the internal covering (3) by means of a first waterproof connection (5) and has a base part (6) having a second waterproof connection (8) with the surface (7) of the roof, where the outer covering (10) is fastened to the building part (1) by a third waterproof connection (12), and where the internal covering (3) at least partly is covered by the external covering (10), characterised in that the first (5) and the second (8) connection each comprises a glue joint, that the use of this glue does not require heating, and that the plate element (4) is a piece of elastic polymer film. <IMAGE>
