Abstract (en)

The present invention provide a sheet cleaning apparatus that comprises a sheet cleaner for removing print material from printed sheets, a stacker on which the printed sheets are set, a sheet feeder for feeding the printed sheets set on the stacker to the sheet cleaner. The apparatus further comprises: a sheet quantity detector for detecting the quantity of the printed sheets set on the stacker; and a controller for starting warming-up of sheet cleaning when the sheet quantity detector detects a predetermined quantity or more of the printed sheets. <IMAGE>
