Abstract (en)

[origin: DE19916710A1] The invention relates to a tool driving device (1), notably for machine tools, which comprises an internal drive mechanism (9) for driving a tool. The invention also provides for a control device (36) which detects the movement of the tool driving device (1) and controls the drive mechanism (9) accordingly. As a result the tool driving device (1) can be controlled independently of the remaining machine tool control.
