Abstract (en)  
[origin: WO9967368A1] Nucleic acid compositions encoding novel ACAT proteins, as well as the novel ACAT-2 proteins, (ACAT-2) are provided. Also provided are methods of producing the subject nucleic acid and protein compositions. The subject polypeptide and nucleic acid compositions find use in a variety of applications, including research, diagnostic, and therapeutic agent screening applications, as well as in treatment therapies for disease conditions associated with ACAT-2 activity.
