Abstract (en)
[origin: EP1090563A2] The shoe insole (1) has a top and bottom covering layer each including a support core (5,6). The edge parts (3,4) of the covering layers protrude beyond the support-core and are joined along the edge part. The covering layers and support core are made of thermoplastic material with an identical melting point. The top covering layer has a cover of material sensitive to the skin, such as leather, patent leather, plastic etc.
