Abstract (en)

[origin: EP1090751A1] A water-spray or steam (22) are generated near the ink-application system (14,16) positioned on the periphery of the printing cylinder.(10). A spray appliance (20) is positioned on the printer's periphery on an area at least positioned at an angle to the ink-applicator system. The spray is above the printing cylinder and is produced between the ink-applicator system and a counter-pressure cylinder (12).
