Abstract (en)

[origin: EP1090754A1] The framework has a drive side and a handling side. A cylinder core (36) containing the printing cylinder sleeve (38) is mounted in the framework so that the sleeve can be axially withdrawn on the handling side. An ejector (42) positioned on the drive side of the framework acts upon the end surface of the printing cylinder sleeve, and or a withdrawing-claw (44) on the drive side of the framework fits into a recess (48) on the edge of the printing cylinder sleeve.
