Abstract (en)
[origin: EP1091338A1] Said publicity support consists of two independent elements, the first of which is made of a foam-like material coupled on the microphone itself and which adopts the shape and appearance of a soccer ball, on which publicity may be placed, and the second consists of a microphone neck which forms an interchangeable element of the support, which may be made from any suitable material and through which the microphone neck is inserted, with this surface adequate for bearing any type of publicity. <IMAGE>
