Abstract (en)

[origin: WO0001606A1] The invention relates to a device for guiding a hand rail, especially in the deflection area of an escalator or moving pavement, comprising a balustrade made notably of a transparent material. The area of the balustrade facing the hand rail is provided with a shaped hand rail guide which especially in the deflection area cooperates with at least one flexible element housing antifriction bearings. The projection surface of the internal diameter of the bearings covers the balustrade surface.
