Abstract (en)

[origin: WO0000580A1] The present invention relates to a fragrance delivery system which provides enhanced fragrance endurance. The fragrance delivery system is suitable for use in preferably liquid laundry detergent compositions which comprise a beta -ketoester pro-fragrance, an ethoxylated polyethyleneimine, PEI 600 E20, and preferably a hydrophilic soil dispersant inter alia PEI 189 E15-E18. The fragrance delivery system of the present invention is suitable for use in laundry pre-soaks and detergent compositions which comprise one or more enzymes.
