Abstract (en)

[origin: WO0001921A1] A system is provided for milling a window in a casing of a borehole formed in an earth formation. The system comprises a milling tool for milling said window, a guiding device for guiding the milling tool along a selected path within the casing during milling said window, the guiding device having means for fixedly arranging the guiding device within the casing. The guiding device is provided with thrust means for thrusting the milling tool along the selected path during milling the window.
