Abstract (en)  
[origin: FR2779217A1] The invention concerns a heat processing installation characterised in that it comprises: a vertically arranged oven (1) whereof the base (2) is provided with a loading/unloading opening (3); loading/unloading means for inserting in the oven - or remove therefrom -, through said opening, a support-plate (6) for receiving the components to be processed (7); and a frame (12) with variable shape, associated with the oven base (2), capable of taking up a first configuration, said to be open, wherein it delimits, opposite said opening, a window allowing the support-plate (6) through and a second configuration, said to be closed, for which said window is partly closed so as to allow only the loading/unloading means through, the frame presenting support zones (20) whereon the support plate is urged to rest when said means are removed from the oven.
