Abstract (en)

[origin: FR2780849A1] The invention concerns a magnetic device consisting of tiered single-unit modules (M1, M2, M3) in the form of plates, having on both their surfaces printed electromagnetic coils in the form of turns. Said device modules (M1, M2, M3) are arranged such that the lines mutually connecting the coils do not encroach on the space available therefor. The invention also concerns a method and an apparatus using said device for reading and displaying a message.
