Abstract (en)
Fireproof wall of high height has a part integral with the upper roof (2a) and a part integral with the lower floor (2b). The superior part (1) has a sheet (11) folded and opened in the inferior end in which the inferior part (3) can slide. The inferior part is made of metallic vertical posts (4) surrounding a core of fire-resistant material (7) and covered by plaster sheets (6). The upper part is made of metallic structure linked with the sheet and the roof and coated with plaster.

Abstract (fr)
Cloison coupe-feu de grande hauteur comprenant des panneaux de parement résistant au feu, disposés de part et d'autre d'une ossature métallique, ladite cloison comportant une première partie et une seconde partie aptes à coulisser l'une par rapport à l'autre de sorte à accommoder les déformations relatives du plancher haut (2a) par rapport au plancher bas (2b). <IMAGE>
