Abstract (en)

[origin: EP1093863A2] The washer station has a turntable (110) with holders for vehicle bodies (308). The turntable is constructed so that a body is turned about an axis from an initial position through an angle of more than 90 degrees , and is stopped in washing positions within the set angular area. The station has a moveable spray or washer plant (150), which is moved into working position when the body is also in cleaning position. The spray/washer plant can be moved into the vehicle body.
